Minority Leader John Testa's Statement on New Ride at Playland

“Contrary to the administration’s statement that the Board of Legislators were part of this decision, this deal was done with absolutely no input from the Legislators. We never saw the RFP results and we were never consulted on what kind of ride the county is investing in. Nor did we approve adding to the already burdensome operating costs associated with the park. Additionally, partnering with a new company without BOL input when the administration just appropriated \$500k for a court case against our current private partners, Standard Amusements is irresponsible.”
