THE COMPASS POINTS TO PEEKSKILL

(Peekskill, New York)... Mayor John G. Testa and members of the Common Council will welcome Environmental Engineering Solutions, Inc. at a ribbon cutting ceremony on Friday, February 15, 2002 at 5:00 pm at 1106 Main Street.

After working for 15 years for other engineering firms, Rengasamy Kasinathan "Kasi" started his own firm, Environmental Engineering Solutions in 1988 in Cortland, New York. Since that time his firm has grown in prominence and the number of employees. When he began looking for space, Kasi wanted to establish his company in an area in which growth was possible and the company would have a noticeable presence in the community. He found both concepts were possible in Peekskill.

Mr. Kasinathan purchased the property from the City of Peekskill and renovated the 2200 square feet facility into modern commercial office space. His firm will occupy a significant portion of the space, with room available for other engineers to lease. This full service firm specializes in air, waste and water pollution prevention techniques. The firm also is EPA certified in lead assessment and holds a NYS certification as air quality assessor. It is his dream that 1106 Main Street becomes known as the engineering peak in downtown Peekskill.

"Environmental Engineering Solutions is a full service firm that puts the client first. Whether the client is a small business, hospital, university or a governmental facility, their concerns are my concerns. We work very hard to give the client a quality product," affirmed Rengasamy Kasinathan.

"The Common Council and I are excited that Mr. Kasinathan has chosen downtown Peekskill as the place for his business. We are very pleased with the transformation that he has done to the building that has long been neglected. Environmental Engineering Solutions has joined the list of professional firms that we'd like to see in Peekskill. We are looking for more companies to invest in the City of Peekskill, particularly our downtown," noted Mayor John G. Testa.
